BART Silicon Valley Berryessa Extension Project Design Build Contract Information Forum

September 30, 2010, 9:30 a.m.

San Jose Convention Center, 408 Almaden Blvd, San Jose, CA

The Santa Clara Valley Transportation Authority (VTA) is bringing an important transportation option to the congested I-880 and I-680 corridors in Milpitas and San Jose. The Berryessa Extension is the first 10 miles of BART Silicon Valley. The Project will extend the existing BART regional heavy-rail system from the Warm Springs Station currently under construction in Fremont, southward into Milpitas and San Jose.

Vendors are encouraged to register with VTA, which is a requirement to receive RFQ and RFP solicitation information.

Vendor Registration can be accessed through the following link:
http://www.vta.org/procurement/account/registration_form.html

Registered vendors will receive ongoing updates regarding the upcoming BART Silicon Valley Design Build Contract.
